

HYDROPHAN 9180

High-concentrated, low foaming degreasing agent

Base:	fatty alcohol ethoxylate
Appearance:	clear liquid
Active matter:	ca. 90 %
Electric Charge:	non-ionic
Stability:	against alkali, acids and electrolytes in usual concentrations

FIELD OF APPLICATION:

HYDROPHAN 9180 is applied for the degreasing of cow- and pig hides as well as for small skins in soaking, liming, reliming, deliming and bating. Other applications are the degreasing of sheep fur skins and -pickled pelts and the degreasing and re-wetting of lime- and chrome-splits with a particularly high fat content.

QUANTITIES TO APPLY:

-0,1 - 0,5 % HYDROPHAN 9180 in soaking, liming and reliming, based on the salted- or green weight

-0,3 - 0,5 % HYDROPHAN 9180 in deliming and bating, based on the pelt weight

HINT OF APPLICATION:

When cow hides or small skins with a particularly high natural fat content are processed, it is recommended to apply HYDROPHAN 9180 preferably after the fleshing partly in a short float during the deliming and partly in the subsequent bating step.

STORAGE HINT:

Protect from cold.
