

## MERPIN 8011

Special soaking auxiliary for hard-to-soak salted hides and fresh hides

Base: various hydrotropic Substances

Appearance: white granulated powder

Stability: against alkali, acids and elektrolytes in usual concentrations

Degradability: completely biodegradable

---

### MODE OF ACTION:

When processing partially dried or uneven salted hides, MERPIN 8011 ensures a rapid and uniform water uptake over the whole crosssection. This action leads to an acceleration of the soaking.

When used on fresh hides, MERPIN 8011 obtains a proper removal and dispersion of low- and unstructured proteins.

### FIELDS OF APPLICATION:

- soaking of partially dried hides and skins
- soaking of fresh hides
- soaking of raw material containing a high degree of natural fat
- to shorten the soaking period

### QUANTITIES TO USE:

0,2 - 0,4 % MERPIN 8011, based on the salted- or green weight

The dosage of MERPIN 8011 depends on the predicted soaking time, the condition of the raw material, the float length etc.

## STORAGE HINT:

Store in a cool and dry place.
