

MERPIZYM 9120

High-concentrated enzymatic liming auxiliary

Base: combination of proteolytic enzymes

Appearance: yellowish powder

Active matter: 10.000 LVU

MODE OF ACTION:

MERPIZYM 9120 is appropriate to support the unhairing and the ceratin dissolution. The product is usually added to the float in powder form at the beginning of the liming step. The hide-opening will be improved. MERPIZYM 9120 is especially suitable for raw materials with a high content of natural fat. The optimum effect is in a pH-range between 10 – 13.

FIELDS OF APPLICATION:

- improved scud-loosening and and epidermis removal
- reduction of liming draw
- accelerated throughliming when heavy raw-material is processed, especially in the neck area
- reduction of sulphides in the liming step

QUANTITIES TO USE:

0,05 - 0,1 % MERPIZYM 9120, based on the salted- or green weight

STORAGE HINT:

Store in a cool and dry place.
